Portfolio - https://tehya-laughlin.github.io

Detail-oriented and creative student at the University of Colorado Boulder aiming to do front-end web development and UI/UX design. Interested in creative problem solving, beautiful UI, and design that leaves a lasting impression. Hobbies include outdoor activities like hiking and tennis, and creating fine art pieces with paint and various drawing mediums.

Job Experience

Anark Corporation - Intelligent Information Management (IIM) Software and Enterprise Content Management (ECM) Software

Quality Assurance Engineer Intern
August 2021 to current
Promoted to more responsibilities in August 2021. Co-Manage bug tickets logged by High School interns in Backlog by Nulab. Use Azure DevOps to log bugs and write User test cases. Continue to write automated UI tests, as well as API tests through Postman. Help with UX/UI design feedback and ideation.

QA Intern
September 2020 to August 2021
Used Excel to create test plans for software testing. Manually tested the software and used Backlog by Nulab for logging software bugs. Tracked software bug progress. Used TypeScript to create automated testing programs in code, to then be run through TestCafe.
